Subject: MLPAComments: Lovers point to breakwater issue....

Hi,

How can it even be considered to open the area between Lovers Cove and the Breakwater up to fishing??????? Please for the sake of all the underwater visitors from the human world who treasure the species that are present for both watching and photographing. Spare them from hooks that are baited with food regularly eaten by these fishes. Let them have a safe place where they regularly interact with people.

Thank you,

Tom Bird
a regular visitor from So. Cal to your area
